The MAILING DATE of this communication app						
Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 22 M	larch 2005.					
•	<u> </u>					
3) Since this application is in condition for allowa		secution as to the merits is				
closed in accordance with the practice under E						
Disposition of Claims						
	 ✓ Claim(s) 1-3 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 					
5) Claim(s) is/are allowed.	Will from consideration.	!				
6) Claim(s) 1-3 is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/o	r election requirement.					
Application Papers						
9) The specification is objected to by the Examine						
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 						
Attachment(s)						
1) Notice of References Cited (PTO-892)	4) Interview Summary					
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date Notice of Informal Patent Application (PTO-152)						
Paper No(s)/Mail Date 6) Other:

Art Unit: 2832

DETAILED ACTION

General status

1. This is a Final Action on the Merits. Claims 1 - 3 are pending in the case and are being examined.

Claim Rejections - 35 USC § 102

2. Claims 1 - 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Erk et al. [US 6,483,066].

Erk et al. disclose a vacuum switch having three phases [column 1, line 21] each phase of the vacuum switch including a vacuum valve [Vs] with a stationary side terminal conductor [KAo] and a moving side terminal conductor [KAu]; the vacuum switch comprising radiators [KKo] for each phase, fixed to at least one of stationary side terminal conductor and the moving side terminal conductor, the radiator having a plurality of fin shaped protrusions [KR] extending outwardly and a cover (closed boundary of radiator functioning as cover which is capable of reliving electrostatic discharge focusing between the radiators) for each phase. The cover has an open-side face [Figure 2, top] of a plurality of fin-shaped protrusions [KR].

Regarding Claim 2, the periphery of the protrusions is fixed to the terminal conductor and the fins and cover are integrally molded.

Regarding Claim 3, the bottom radiator KKu is disclosed with a plurality of openings LE, which are parallel to each other [Figure 3], and the fins left between the openings are parallel to each other in lengthwise direction of the radiator.

Application/Control Number: 10/820,784 Page 3

Art Unit: 2832

Response to Arguments

3. Applicant's arguments filed 03/22/2005 have been fully considered but they are not persuasive.

- 4. The rejections in the previous office action under 35 USC §112, second paragraph, are withdrawn in view of Applicant's amendments.
- The Applicant has argued that the vacuum switch disclosed by Erk reference "does not cover at least one of the claimed radiators such that electrostatic focusing between the radiators is reduced and the end part of all fin shaped protrusions (refer to Figure 2, top)", although the latter part of the argument does not make sense (appears to be typographical error) the Examiner respectfully disagrees. The switch disclosed by Erk is capable of reducing electrostatic focusing between the radiators.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
